

CASE STUDY:

K Rend Centre of Excellence

Clarke Eco Wall Ltd finish new K Rend Training Facility in TC15

The impressive Training Centre of Excellence set in K Rend headquarters in Larne; Northern Ireland was finished using Silicone TC 15, a ready to use organic resin render which is applied to provide a low maintenance textured finish, particularly suitable for External Wall Insulation Systems.

The purpose built facility will welcome plasterers from throughout the UK and Ireland, delivering high quality training from skilled K Rend instructors.

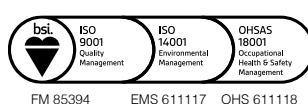

Silicone TC can be used to enhance and protect both old and new facades and holds the prestigious kitemark license to BS EN 15828:2009.

A major part of the project was the entrance façade showcasing some of the extensive range of colors available in K Rend TC15 using the Natural Colour System (NCS).

The training facility, over two-floors has been finished to a very high standard with impressive fixtures and fittings aiding the practical demonstrations.

K Rend Materials Used

- ▶ TC15 bespoke colour range from the NCS
- ▶ K Rend TC15 White
- ▶ Standard UF Base Coat
